**Re: In the Matter of Petition of USTelecom for Forbearance Pursuant to
47 U.S.C. Section 160(c); WC Docket No. 18-141; Category 1**

Dear FCC,

I'm a computer systems administrator. My clients benefit from having redundant ISP's and generally have two or more connections at every location. In some cases I choose differing ISP's due to different design philosophies to their network.

As in most marketplaces, a wider range of choices to a consumer mean the consumer can find something that is a closer fit to what they want. Reducing the choices available to a consumer is likely no only to be extremely unpopular, but will also increase business costs and reduce productivity.
